

**'Future Cyberpunk For Serum'** by Immense Sounds is the 1st pack in this series featuring an outstanding 128 x Serum Presets and Demo MIDI Files bringing up-to-date sounds for your next Cyberpunk projects.

Cyberpunk is a subgenre of science fiction characterized by a dystopian future dominated by high-tech advancements and cybernetics, contrasted with societal decay and corruption. Originating in the 1980s, it focuses on the dark side of technological progress, exploring themes like artificial intelligence, virtual reality, and the blurring lines between humanity and machines. Cyberpunk often features protagonists who are hackers or rebels, challenging oppressive systems and corporations. The genre's aesthetic is gritty and neon-lit, capturing a chaotic, urban environment. Authors like William Gibson and Philip K. Dick have significantly contributed to its development, creating immersive worlds that question the ethical implications of technology on society. Cyberpunk continues to influence various media, inspiring films, video games, and art, making it a crucial part of contemporary science fiction culture.

This is a must-have sound set for all types of Cyberpunk producers including techno, darkwave, synthwave, industrial, electro house & industrial techno containing fantastic Acids, Basses, Drones, FX, Growls, Leads, Pads, Plucks, Sequences, and Synths only fresh inspiring, modern preset sounds for your toolbox, also contains all MIDI files from the demos which can be used royalty-free, if you are looking for Cyberpunk drum samples please check out our cyberpunk dystopian sample packs that is available now.
