Gin Tonic

Thank you for purchasing Gin Tonic, I hope you will enjoy these 64 sounds and make good use of them in your music creation!

Installation:

1: Unzip the "Gin Tonic Soundbank.zip" folder, you have downloaded. It contains the *Gin Tonic (by Samuel Bereczky).sbf* Spire bank file, and this very pdf. :)

2a: Open Spire in your DAW, push the "MENU" button on Spire's UI and select the option "Open Bank Folder". Put *Gin Tonic (by Samuel Bereczky).sbf* there.

vs

2b: Alternatively you can put *Gin Tonic (by Samuel Bereczky).sbf* where you like in your computer, then push "Import" on Spire's UI right at the top left corner, and locate it. Spire will make a copy of it to the default folder.

3: **Important step:** reload the plugin (until it the bank will show up with empty "init" presets)! From now on you can find Gin Tonic among your other banks when you click on "Select".

4: You will see "ARP Dream Drops" appearing in Spire's preset selector bar. It is the first preset of this bank. Step through the presets by the arrows next to it or click on the bar and choose from the listed presets there. They are ordered by category (arps, basses, etc).

Playing with the presets:

Each single preset is carefully programmed to make good use over wide range of the keyboard, being responsible to MIDI performance options such as Velocity, ModWheel, PitchBend and Aftertouch. Besides don't forget the (relatively) new Macro Controls on Spire's UI, you can instantly tweak easily the sounds by them, to find the best way how they fit in your mix, and to create movement by automating them in your DAW. Enjoy! :)

List of the presets:
