

We've created a small free collection of unique pad presets for you. If you are a master of ambient tracks, then this is what you need. Despite the fact that these presets are free for everyone, they are made at the level of commercial sounds. All presets are created from scratch. We did not use the sounds of our commercial banks. All presets are unique to this bank.

This is an interesting collection, only the first collection. In the near future, we will release some freer presets for creating beautiful ambient music.

We hope you enjoy this set and use it frequently in your tracks!
