

The Audio Bar presents 'Being Alive', a new Future Bass Template. Inspired by Flume, Hudson Mohawke, The Chainsmokers and many more!

Learn how all the elements are mixed and special sidechaining techniques essential to the creation and movement of the Future Bass style.

Dissecting project files is one of the best ways to learn music production for beginners, and for advanced users one of the best ways to pick up a few new tricks.

This project teaches in depth: sound layering, sidechain automation, mixing & mastering, and more. Once you have studied the elements in this project, you can then delete and tweak the elements and create a new fresh track.

This project includes all the MIDI's, one shots, loops, presets; we are sure you will make good use of it. As a bonus, we also included a producer's handbook with exclusive production tips behind this project.

Specification, depends on the purchase option:

- 1x Ableton Live Project File
- 1x FL Studio Project File
- 1x Logic Pro X Project File
