

It's time to bring out the funk! Big EDM: Funky House is a crazy new pack full of groovy Drum Samples and Presets that is guaranteed to bring your production to the next level!

With hypnotizing melodies, Funk House is a complex genre stemming from a mixture of two genres, Funk and House, both of which bring an interesting yet delightful individuality to the genre as a whole.

Funk House, also commonly known as Disco House, is a subgenre of House music that uses a plethora of Funk or Disco Samples that are beautifully combined with a Funk or Disco Bassline and Melody, brought to life with a strong Soul influence.

The major attention grabber of this genre as a whole is the 1970s and 1980s inspired Drum Breaks that really crush that nostalgic feeling. Like most if not all variants of House, Funk House makes a heavy use of Synthesizers, Samples and Soulful Vocals. The most notable names in the Funk House scene are Basement Jaxx, the Freemasons, Soul Central, Armand Van Helden and many more!

The idea being creating a Funk House inspired pack was to show the beauty behind the sound of Funk House. Mastering the art of Funk House sound design is a very intimidating step to make. But no worries, we have that covered for you!

This is what you get with this amazing pack!
