

Freak Music is proud to introduce the "Bounce Vocals" - collection of bouncy lead loops, vocal loops, samples, presets and MIDI Files. **Each melody kit is key and tempo labeled and comes with all elements, so you can flexibly compare different sounds and make your own, original progression with the files included.** As always, each melodic part is available as a MIDI file.

The inclusion of the MIDIs, samples and presets means of course that producers of Bounce and Electro styles can also find huge value in this pack as the melodies and sounds could easily slot into any EDM track! You also get to choose what sounds are playing what, which gives you more control over the final sound. The content in this pack has been inspired by producers such as Timmy Trumpet, TJR, Deorro, Vinnai, Redfoo, R3hab and many others. Everything is carefully processed to perfection at 24-bit WAV quality. All of the samples, loops, MIDIs and presets are **100% Royalty-Free** licence, so you can use them in your commercial releases without having to pay any hidden costs. Have fun and make great music!
