

We want to announce a special release with a different artistic feel. Not just audio, but in-depth sound development and creation. This what Calder Nest brings to you, an exclusive approach of 100 sound files inspired in real-time environments.

Some hand-recorded by our A-level engineers and other designed synthetically by the in-house producers. With a strong connection with artists like Flume, NATIVE, The Chainsmokers, DJ Snake, Quix and others.

The loops and one shot samples in Calder Nest are all key-labelled, as well as tagged with their tempo. With a palette of unique vocal chop samples popular on Future Bass and Pop tracks, radio hit melodies and naturally recorded one shot samples.

From The Audio Bar HQs, we hope you enjoy Calder Nest as much as we loved developing it. If that's not enough, we wanted to include some bonus production video tutorials on how to make some of these key elements Future Bass/Pop tracks.

What's inside the pack?

- 100 Total Files
- 50 Audio Loops
- 50 One Shot Samples
