

Why use old and outdated sounds? Big EDM is giving you the sounds of tomorrow, today, with their latest release, Charged Future Bounce. With this pack, you will get top quality audio samples, wet and dry loops, presets and MIDI.

Are you frustrated with sample packs that limit you to the use of only a handful of samples? We encourage your creativity and originality by offering multiple track elements and alternate variations. By including both the wet and dry versions you can then decide if you want to alter the original and truly make it your own. Our sound design professionals have made it easy to open our packs, load up the sounds, create, and have a club-ready sound with excellent clarity and top-notch quality.

Packing an electrifying punch, Charged Future Bounce lets you choose from intense fx, percussive sounds, piano loops and presets, dramatic orchestral strings, reverberated plucks, hats, rides, and other cymbals, tight punchy kicks, risers, snares, light pads, clicks, air raid sirens, claps and snaps, futuristic mechanical bleeps, tempo-synced bass rhythms, bright lead synths, as well as presets for Serum, Spire, and Sylenth1.

Create endless future bounce that is melodically powerful, inspiring and motivational, or blaze through the night with a punchy, pulsating, bounce groove. It's time to accelerate your imagination and jump-start your productions with Charged Future Bounce from Big EDM.

Inspired by such artists as Mesto, Brooks, Curbi, MOTi and more.
