Cloudlands - Dreamy Presets For Pigments 4

Get Your Head In The Clouds

Cloudlands is all about the dreamy vibe. We wanted to encapsulate the feeling of the oniric world into sonic signals. The more we create presets, the more it makes sense to create a pack around a theme rather than a genre, and in this case, we dove deep into the theme of dreams.

Any genre you produce, if you need that dreamy vibe, it's there, in the Cloudlands.

Like a lot of our products, this bank is made using Fractal Sounds grade granular synthesis techniques. We even created new granular sources for Cloudlands.

In this pack you will find floating granular atmospheres, shiny textures, sparkly synthscapes and much more.

⋆ This bank requires Pigments version 4.1.1 an above to run

This pack contains
- 12 Dreamy Lead Presets
- 8 Dreamy Pluck Presets
- 39 Dreamy Atmosphere Presets
- 27 Dreamy Sequence Presets
- 14 Dreamy Granular Fx
