

'Club Essential Series: Deep House Kits Vol 2' brings you five Construction Kits for creating Deep House. Each Kit includes everything you need including MIDI files, WAV loops, Spire, Serum, Massive and Avenger presets that were used for creating the Kits.

All the Construction Kits include the tempo and key information to give you an efficient and easy workflow. All the Kits were inspired by some of the biggest Deep House labels such as Enormous Tunes, Sirup Music, Selected and many more.

Every single instrument track is bounced in stems so you can simply drag and drop all stems from one Kit into your DAW and you will have an immediate full arrangement.

Also, all WAV files have been recorded at 24-Bit Quality and are fully mixed and mastered so you can directly start to work out your next Deep House single.
