

'Club Essential Series: Future Bass Kits Vol 1' strikes back and brings you 12 top-notch Construction Kits for all Future Bass producers out there. This pack includes over 450 files including MIDI, WAV loops, drum samples and sound presets for the most used synths such as Sylenth1, Serum, Massive & Spire.

All the Kit folders have the drum one-shots and MIDI files included for each Kit the sounds used to give you the best workflow. Also included is an extra folder with even 55 more single drum one-shots such as snares, kick drums, cymbals and percussions to also assist you with your next Future Bass track.

The aim is to deliver you the most high quality samples & sounds possible to help you to evolve your sound and to assist you with your next Future Bass productions. All samples are 100% Royalty-Free and can be used in all of your upcoming productions.

This sample pack is definitely a must-have for all producers who need inspiration or just the right samples to create their own masterpiece of music production.
