U-HE ZEBRA 2

"COSMOS"

soundset by
Otto K. Schwarz

LFO.Store

Description

LFO.Store proudly presents a brand new soundset for u-he Zebra software synthesizer. 40 amazing presets, created by the well-known sound designer Otto K. Schwarz, are waiting for your wise action!

"Cosmos" is openning the portal to a new dimension, that is full of breathtaking sounds. Amazing long-modulated pads will show you the depth of the cosmic space. Leads are saturated with the radiance of the distant stars and echoes of other civilizations' voices. Plucks will help you to touch the asteroids and feel the presence of the unknown planets. And much more!

Whether you're creating ambient, EDM, soundtracks or experimental music, this collection of sounds will always be at your service!

Specification

Please take into account that **Zebra v. 2.8** was used to create these presets. This is rather unable to use the soundset on earlier software, or you will face several errors.

There are **40** Zebra 2 presets in the soundset:
14 ARPs, 7 Leads, 14 Pads & 5 Plucks.

100% Royalty-Free.

Installation

1. Update your Zebra 2 VST if you're using software version earlier than 2.8.

2. Copy "Cosmos" folder into your Zebra VST presets folder (inside the u-he/Zebra.data you will find the "Presets" folder).

3. Now it's time to copy "AKWF" folder. This is the free collection of wavetables for Zebra. You need to place it into the "Oscillators" folder, which is located inside the "Modules" folder. Basically, the path is the following: \Documents\u-he\Zebra.data\Modules\Oscillator.

4. Run your Zebra software.

5. Enjoy!

Best wishes,

LFO Store team
