Ultimate EDM & Festival Drops contains over 750MB of content spread across the absolute highest quality audio, MIDI, presets, Prod-Cast video tutorials and a production booklet.

You'll also find 6 ridiculously heavy Songstarters consisting of all the components you need to create full tracks from start to finish.

We include all melodic parts as MIDI files and every synth preset giving you full control.

In addition we have also included bass and synth loop presets so you can re-create the sound with the all important channel strip settings which are such a major part of the sound.

To assist the producer long-term we provide 3 Prod-Cast video tutorials showing you how to improve their skills not only within the EDM genre but also as a producer.

As usual our packs contain a video with music production productivity guru Mike Monday and another video which is the ultimate guide to pitching your music to labels and industry professionals from the Music Marketing Academy's Budi Voogt.

We are Sample Tools and this is Ultimate EDM & Festival Drops!
