

**'Cyberpunk Portal'** by Immense Sounds is five outstanding Cyberpunk Construction Kits featuring WAV, MIDI & Presets.

This top-quality pack inspired by Cyberpunk is a subgenre of science fiction that emerged in the 1980s, featuring high-tech, advanced settings saturated with computer technology, juxtaposed with societal decline or dystopia. The narrative often includes post-industrial dystopias, AI, cybernetics, and radical changes in social structure.

Often dark and gritty, the genre provides an introspective examination of the human condition amidst rapidly changing technologies, framed through a lens of "high tech and low life". Cyberpunk characters are typically marginalized, alienated loners living on the edge of a corporate-dominated society.

Its visual aesthetic, known as 'neon-noir', blends futuristic neon lights with a grim underbelly of urban decay. Key themes include omnipresent corporate power, invasive surveillance, genetic engineering, and the intertwining of the physical and digital via cybernetics and virtual reality.

This pack features wav stems such as Acids, Basses, Synths, FX, Reese, Vox, Subs, Leads, Percussion and more, MIDIs & Serum Presets.
