Cyberpunk is a subgenre of science fiction that emerged in the 1980s. It typically focuses on the intersection of advanced technology, particularly information technology, and cybernetics, with a gritty, urban society characterized by social upheaval, corporate dominance, and stark income inequality. Cyberpunk often explores the consequences of rapid technological advancements on human identity, the nature of consciousness, and the blurred line between the virtual and physical worlds. This genre is marked by a futuristic, high-tech setting and a cynical, anti-establishment tone.
