

'Dark Progressive Sessions Vol. 3' brings you another set of five Construction Kits inspired by artists such as Miss Monique, Boris Brechja & Solomun. This pack is filled with punchy drums, Sylenth1 & Spire VST presets, dark lead sounds and punchy pluck sounds. The sounds inside this pack can also be useful for other genres like Deep House & Techno.

All samples are provided as 24-Bit WAV to deliver you the best audio quality and as always, all samples are 100% Royalty-Free.

Every single Kit is split up in the following parts:

MIDI:

Each Kit has its own MIDI folder to give you the freedom of changing any melodic part or use your own sounds from any of your favorite soft synthesizers.

One-Shots:

This folder includes all the single drum one-shots that were used for each Kit and allows you to drag and drop your favorite drum samples into your sampler and create new rhythms.

Stems:

Essential Audio Media exported all the stems as 24-Bit WAV files, so you can drag and drop them at once into your DAW, and you'll have the full Kit. They also added a dry folder where the synths are without any effects, so you can add your own reverb or delay settings.

Loops:

All stems are also available as 4-8 Bar loops exported as 24-Bit WAV to give you more freedom to make any stem file fitting into your project.

Presets:

Inside this folder you'll find the presets used in the Kits. Essential Audio Media have included presets for the Spire and Sylenth1 VSTi's.
