All samples are provided as 16-Bit WAV to deliver you the best audio quality and as always, all samples are 100% Royalty-Free.

every single Kit is split up in the following parts:

MIDI: Each Kit has its own MIDI folder to give you the freedom of changing any melodic part or use your own sounds from any of your favorite soft synthesizers.

One-Shots: This folder includes all the single drum one-shots that were used for each Kit and allows you to drag and drop your favorite drum samples into your sampler and create new rhythms.

Stems: Essential Audio Media exported all the stems as 16-Bit WAV files so you can drag and drop them at once into your DAW and you'll have the full Kit. They also added a dry folder where the synths are without any effects so you can add you own reverb or delay settings.

Loops: All stems are also available as 4-8 Bar loops exported as 16-Bit WAV to give you more freedom to make any stem file fitting into your project.

Presets: Inside this folder you'll find the presets used in the Kits. Essential Audio Media have included presets for the Spire, Serum and Sylenth1 VSTi's.
