

'Deep House Piano Loops & Melodies Vol 1' includes 40 eight bar melodies inspired by artists such as EDX, James Hype, Duke Dumont, Nora En Pure, Felix Jaehn and many more.

All WAV loops are already mixed and mastered, so you can drag and drop your favourite loop directly into your DAW and start to work with them.

Also added for each loop are the MIDI files so you can easily change notes or use your own sounds. This pack brings everything what a Deep House producer needs, from groovy chord progressions to beautiful pads to create the perfect ambience in your next Deep House production.

This pack is a must-have for everyone who needs inspiration for new chord progressions. All loops can be also used for other EDM genres such as Progressive House, Big Room House, House, Future Bass or wherever else big melodic chords are needed.
