

Don't let not having a studio vocalist stop you from finalizing your project. Big EDM is giving you Deep Phat Vocals. A huge pack that includes 5 construction kits, audio loops, samples, and one hits. With this pack, you can add soulful vocal tracks that sound beyond amazing. Choose from our processed and mixed acapella rendering or use the dry track to edit and add your own effects. Adding vocals gives your song more dimension and can make it more expressive.

Choose from vocals that are soft and elegant, smooth and passionate, powerful and emotive or adventurous and energetic. Deep Phat Vocals can satisfy your vocal needs by offering a diversity that can be applied to EDM, Chill, Hip Hop, RnB, Deep House and more.

In addition to the sounds used in the kits, we want you to have more freedom in your design. We have included a library of additional loops and samples that will make your possibilities limitless. You will find drum samples that offer a low end that really bumps. Kick drums that are heavy, sub bass, muffled, tight, and punchy. Organic snare sounds that cover several acoustic environments.

Melody loops that include airy siren pads, arpeggiated retro synths and light future pluck. Atmospheric sounds such as stutters of light static and light mechanical glitches. Pure sine generated bass lines that have a smooth decay and will morph smoothly between shapes. Crunchy, deep and dirty bass lines that are sure to give the club drivers a run for their money. Metallic and crisp cymbals and many other percussive sounds to accentuate the dynamic.

Give your track the extra character that only a human vocal can provide. Pick up Deep Phat Vocals from Big EDM.
