

We spent some late nights and early mornings in the studio studying the fundamentals of modern Dubstep production and sound design to bring you the best of the best! Like an old car, we stripped it down, painted and polished a pack that will transform any producer into a powerhouse in the EDM scene. We present to you What About: Dubstep Salvation!

With producers in mind, Dubstep Salvation comes with Construction Kits that allow producers to gain the knowledge on what exactly goes into a Dubstep track. We have included the Ableton project files along with the finest quality of crafted "drag and drop" samples used in the project. This is a great way for producers to see what effects we put on bass, how we mix the drums, and how we mastered the overall track.

Dubstep Salvation contains:

- 5 Construction Kits
- 5 Ableton Templates
- 20 Melody Loops + MIDI
- 15 Drum Loops
- 15 FX
- 20 Synth Shots
- 30 Snares & Claps
- 20 Kicks
- 20 Percussion
- 10 Cymbals
- 487+ Sounds In Total
- 1,61 GB Of Content

FAQ:

“What makes your Dubstep packs different from others?”

The simple answer is quality, but to go more in depth, we know that keeping up with the current trends in digital music is a huge thing. We keep up with the latest technological advances and sound design techniques to ensure we are up to date with the modern changes in the Dub step scene.

“What is the point of adding Construction Kits when you could just add more samples or presets?”

You don't do things, "just because". the way to stay on top is to know the how what, and why behind what you are doing. Construction Kits provide

a learning resource keeping you up to date on the latest EDM techniques that can be applied to more than just a handful of samples.

System Requirements:

- Ableton 9 (or higher)
