

Big EDM is super proud to present a huge 5 GB pack aimed at all EDM producers.

The producers behind the pack worked hard to bring you the most complex product possible. Thanks to their efforts, more than 750 perfectly crafted and produced files divided into arranged folders and sub-folders.

12 mammoth construction kits are just a small, but important part of this epic library & each kit comes with presets and MIDI's.

As all EDM producers know there is never enough of breakdown and drop melodies which is why the Big EDM team also created 30 unique drop and 20 break loops. All loops contain MIDI files and drop loops contain the sidechained versions.

To make the pack even more complex, it contains a huge number of drum one-shots (including tuned big room kicks). All of this is presented in 20 massive drum loops which are divided into separated stems.

To make this product even more hot, Big EDM has decided to include Big Room Snares, EDM Drop Horn Stabs, Sylenth1 & Spire presets and Unique EDM vocals (Dry & Wet).

Well made tutorials need to be a part of any pack, with this pack no exception. We have included 3 tutorials in total (Logic Pro & FL Studio) FL Studio projects created during the tutorial and all samples and presets.

Product includes:

- 12 Construction Kits (100% Royalty Free)
- 20 Drop Loops
- 30 Melody Loops
- 110 Drum One-Shots
- 20 Drum Loops (100 Loops in total)
- 55 Sylenth1 Presets
- 5 Spire Presets
- 28 Vocal Samples
- 5 Drop Stabs
