

Need to give a mainstage performance? Don't just stop at the top, go over the top, festival style with EDM Festival Spirits from Big EDM. This mega monster pack is stocked, loaded and ready with 8 Construction Kits that include the FL Studio Project Files with WAV/MIDI and Presets. Don't have FL Studio? No problem. Each kit has been broken down into stems that you can slice, dice, mix and manipulate. Want to expand your creativity outside of the kit? Choose from additional one hits, fx, melodies and presets that we have included.

From this pack, you can expect to find every song element you need. Leads that actually lead, plucks, wobbles, reverse vocal stabs, snare rolls, builds and fills, tension builders (pre-drop), explosive drops, energetic drum patterns that pump, pound and shake the ground. And because it's inspired by festival sounds and artists, you can use this pack to create almost any subgenre of EDM.

Festival performers break out the big guns, their best sounds that take a show and turn it into an experience. We've captured that momentum, that clarity and that perfect delivery of what makes every sound larger than life. Why take a chance on sounds that may or may not sound just as good at an open-air festival as they do in headphones? Go with a name you can trust and sounds that never fall flat. Pick up Festival Spirits from Big EDM.

Our audio sample packs are created by experienced sound design professionals. Our goal is to provide you with the most unique and innovative sounds with our highest regard for quality.
