

'EDM Spire: Sounds of Tomorrow' from ISR is loaded with all of the essential presets for you to hammer out ear-shattering tracks from the ground up. Industrial Strength Samples and Sound Of Tomorrow deliver a slamming bank of powerful Spire presets for any producer diving into this popular soft synth. Audio Tool Kits are also included. This pack is loaded with powerful bass sounds, thick leads and cool FX sounds.

'EDM Spire: Sounds of Tomorrow' also comes complete with Audio Tool Kits to jumpstart your modern electronic production. Each highly useable Mini Kit contains all of audio you hear in the demos, equipping you with a diverse array of MIDI files, huge basses, leads, saturated synths and polished drums.

These presets and samples are suited to just about any EDM style from Big Room to Electro, House, Tech House, Trance and beyond. Break down the demo tracks and rebuild them to your liking. Tweak, twist and mash the MIDI files with your own soft-synths.

NYC's Michael Moscoso produced this pack with steadfast vision and commitment to the hard-hitting sounds of underground EDM. As Michael Phase, Ponchoz, and one half of Droid Beats, Moscoso's achievements in mixing, production and performance are marked by a tireless work ethic and adherence to his craft.

This second Sounds of Tomorrow pack is no exception. Specially designed for Spire lovers, it can be used in any Electronic music style. As the SOT collection expands, expect incredible sets for powerful soft synths along with more audio packs.

These Royalty-Free 24-Bit/44.1kHz patches and kits are delivered as WAV files, as well as MIDI and Apple Loops so Logic users can lock samples into any tempo.

All samples are clearly labelled for instant & easy use in any DAW or sampler.
