

## **Essential Future Bass Spire Presets**

Future Bass no doubt has been the number one genre man producers have come to make this past year. With many notable artist jumping on the future sound bandwagon. Future Bass has been a genre that expresses a more melodic side of music production. While still greatly used, Reveal Sound Spire has been known for having a more heavy sound in presets heard in many tracks. There aren't many packs that can use the synth to give off a more melodic, softer yet heavy sound for Future Bass. In this preset pack you will find many sounds suitable to make your next future bass banger stand out.

This preset pack comes with a variety of sounds ranging from 20 Chord presets from Supersaws for your drops and Much more mellow sounds for intros. 15 Lead Presets to add variation and add more melodic tones to your mix. 10 Pads to settle down your audience for the drop. And 15 Plucks all unique in their own way. If presets wasn't enough for you, we also included 2 future bass construction kits to get you started as well.

This pack is designed in the likes of: Flume, Shawn Wasabi, Marshmello, Slushii, Jack U, The Chainsmokers, San Holo, Louis The Child, ODESZA, Unjico/Snail's House, And Many More!

[Please note that the drums heard in the demo track are NOT INCLUDED]

[The Main Chords in the second demo track used volume automation to achieve that sound, Preset Used: Jeux]

**\*Requires Reveal Sound Spire Version 1.1 or Higher\***
