

'Essential Pop Moments Vol 4' by baltic audio is inspired by artists like Benny Blanco, Years & Years, Mabel and Fletcher. 5 ready-to-use construction kits offer songwriters and producers a wide range of possibilities. Use the productions to write vocal toplines or use the guitar samples to spice up your own song.

The included electric & acoustic guitars are recorded for use in commercial pop music. But also a use in House, EDM or Country music works well.

Besides the guitars, the construction kits contain loops and oneshots for most of the sounds used, such as drums, basses and synths.

The loops are available as DRY, WET and WET TAIL versions and offer the producer, together with some MIDI files, a lot of possibilities to adjust the existing sounds and melodies to his own needs.
