

We present you Exhale! Our first bank of melodic vocal loops and one shots was inspired by legendary artists like Dom Dolla, Solardo, Oliver Heldens, UMEK, Don Diablo, Charlotte de Witte, Chris Liebing and more!

Each vocal sample was exclusively recorded at The Audio Bar HQ by high quality “in-house singers”. Our team then pitched, chopped, and warped these samples into extremely catchy melodic runs and versatile, useable one shots!

With versatility in mind, we also made sure to provide vocal loops at a wide variety of Key-note labels, so these would be great for every genre of music!

If you're an artists who enjoys using vocals on a regular basis to bring your songs to life, then Exhale will become an essential part of your production.

You can search quickly through the key-labels, and drag & drop instantly on your next track. Make your tracks sound professional and “radio ready” with these world-class vocal samples!
