PACK DESCRIPTION:

Datacode is proud to present FOCUS: Analog Techno Basslines a massive follow up to our successful FOCUS: Techno Basslines and FOCUS: Tech House Basslines sample packs. This time our sound design team have gone deep into the analog hardware world and expertly crafted a powerful collection of modern and cutting-edge Techno Bass Loops that cover many genres within Techno and House!

No hardware knob or slider was left untouched in the immersive afterhours studio sessions, we obsessively pushed the limits of some of the best analog and monophonic synths including industry favorites such as Moog Matriarch, Moog Mother-32, Arp Odyssey, Roland SE-02 and much more to create a rich, deep, distinct and one of a kind bassline sample library! The analog synth sound sources are only one half of the ingredients, equally important is the truly inspiring melodic, rhythmic and sequential basslines we designed to provide producers with endless inspiration and a driving essential core bassline element for your next track!

In this pack you can expect to find 102 Bassline Loops and 20 Oneshots samples that aim to exceed your Low End cravings and are suitable for many different genres. All sounds are Key and Tempo Labelled and Royalty Free!
