

Datacode is proud to present FOCUS: Diva Melodic Techno, an absolute powerhouse preset bank for the highly regarded u-he Diva synth with a deep focus on the latest sounds in Melodic Techno & Progressive House! Our sound design team has spent countless hours tweaking and refining this premium and custom collection of Diva presets to deliver an authentic soundset that features the most sought-after and genre defining sounds of Melodic Techno and many forward-thinking and distinct sounds you will only find in this pack. Diva is an award-winning synth known for its exceptional analogue edge and warm, rich sound, making it a top choice for many Melodic Techno and Progressive House producers.

FOCUS: Diva Melodic Techno includes over 80 Diva Presets with deep character and cutting edge sound design featuring a massive selection of detuned, brassy, soft and overdriven synth leads, rich analogue style bass, unique synth and bass arp presets that can be played lower or higher on the keyboard to turn a synth arp into a driving bassline, also includes several haunting cinematic and wide drifting pads.

Explore the 5 Construction Kits with all the tools and elements you need to start on your next track including Wav Stems, Midi files, Loop Versions and Key & Tempo labels for all essential sounds. Be sure to listen to the full Audio Demo to hear all the deeply inspiring and energetic synth melodies and basslines created with the Diva presets and loops included in this pack!
