

We are hyped to announce Fabrik! A Techno Spire Presets pack inspired by names like Charlotte De Witte, Adam Beyer, Nina Kraviz, Alan Fitzpatrick, Blawan, Carl Cox and more!

So what is so cool about these techno presets you ask, well since you probably haven't listened to the preview yet we will try to explain. To put it simply, it's a collection of techno sounds you just couldn't find before, they're deep, grimy, plucky, warped, mesmerizing and as fresh as a spring's morning, which means you've got your hands on a serious piece of kit to breath new life into your Techno & Tech House productions.

This all takes up a lot of time. When you're in the studio, you need to be in a creative state of mind, in order to deliver results. Instead of spending countless hours dialing in the right amount of voices and detune in your soft synth. That's where Fabrik comes in.

Our team of sound designers has already put countless hours into crafting all 50 presets. This means you can get straight into making music without the endless tweaking.

So from HQs of The Audio Bar, enjoy the preset pack!

What's inside the pack?

- 50 Spire Presets;
- 1 Soundbank;
- 35 Bass;
