

'Future Chill & Electronica' from TD Audio is an amazing collection of 24-Bit, high quality WAV audio. Future Chill and Electronica are both diverse styles and this pack contains a great mixture of sounds and textures that will excite your next musical creations in a big way.

Each sound is tempo and key labelled for ease of use. You can easily mix and match the two musical sides of this pack and create completely unique sounding tracks. Check out the demo track from just using this one pack.

This sample collection can work well with modern Hip Hop, Glitch, Downtempo, Lounge, Chill-Out and Synthwave.

'Future Chill & Electronica' dives deep into live instruments, beautiful synths and Cinematic percussion, tight drum sounds, glitch bass and modern ethnic vocals which will inspire your next production.

Please Note:

You must own a licensed copy of Reveal Spire, NI Massive and U-He Diva to use the presets included in this pack.
