

The Follow up of our popular FUTURE HOUSE MUSIC samplepack is here, we prepared a HUGE new samplepack for you; more music, more new melodies & ideas.

The pack has 6 FULL Construction Kits, Drums One Shots, Synth One Shots, Basses, Serum Presets, Midi and so much more.

Future house music is still one of the most popular house styles played around the festivals and clubs by the dj's.

We also received a lot of positive reactions on all our Social Media during the last release. That's why we decided to add a much requested feature: "Layered Processed Leads & Basses One Shots" Most of the important sounds are now included as One Shots & Presets in the pack. This way you are more flexible when producing with the help of our construction kits.

FUTURE HOUSE MUSIC 2 features:

- \* Flexible Production Pack with "Layered Processed Leads & Basses One Shots"
