

'Future Minimal Deep Tech' by Immense Sounds is five outstanding Construction Kits featuring WAV, MIDI, and Serum presets.

"Future Minimal Deep Tech" sits in that sweet spot between hypnotic minimal and punchy tech-house, with a deeper, moodier backbone. It's built for late-night rooms where the groove matters more than big "hands in the air" moments—music that keeps you moving without shouting for attention. Tempos typically live around the 122–128 BPM zone, but the real identity comes from the micro-detail: tight drum programming, rolling low-end, and small, constantly evolving changes that make a loop feel alive for minutes at a time.

The kick and bass relationship is the engine. Kicks are usually rounded and weighty rather than aggressively distorted, while the bassline is often a short, elastic pattern—subby, funky, and syncopated—locked to the swing. Percussion is crisp and spacious: shakers, rim clicks, and delicate hats create forward motion, while ghost notes and off-grid hits add that "human" push-pull. Instead of huge breakdowns, you'll hear subtle tension tools—filtered risers, tiny delays, reverse tails, or a single percussion element mutating over eight or sixteen bars.

Sound design leans minimal but high quality. FX are clean and purposeful: dubby echoes, short reverbs, and stereo tricks that widen elements without washing out the groove. Stabs and chords are usually restrained—deep, warm, and slightly techy—often just a few notes or a simple motif that reappears like a signature. Vocals, if used at all, tend to be chopped, whispered, or processed into rhythmic texture rather than a full topline.

In a DJ set, Minimal Deep Tech is a connector and a driver: perfect for building long blends, maintaining momentum, and keeping a dancefloor locked into a steady hypnotic flow. It rewards good systems and close listening, where every small shuffle, bass wiggle, and delayed clap becomes part of the tension. The result is music that feels sleek, underground, and endlessly groove-focused—minimal on the surface, but deep in the details.

Product Details:

5 x Full Top-Quality Future Minimal Deep Tech Construction Kits.

238 x Total Files.

176 x 24-bit WAV files.

31 x MIDI Files.

31 x Serum Presets.

All Kits BPM & Key-Labelled. (Kits BPM 126 – 128).

1.78GB Zipped | 3.08GB Unzipped.

Everything is 100% Royalty-Free.

Please Use Serum 1.36b8 Or Higher. Please Note: Keep your software legal and up-to-date to avoid any issues when loading your new presets.

About Presets In This Pack

Please note to beginners if you do not own the above Serum VST Instrument the supplied WAV files are in each kit to be used instead of a VST instrument or you can still use any virtual instrument of your choice with your own presets or bought presets to assign the VST instrument to the MIDI files and create your sound, by all means, use the included VST Instruments presets if you have them royalty-free.
