

Future Pop Drums from Function Loops is a special collection, including only the drum samples and loops, collected from all the future pop packs, released this year.

Function Loops felt there's a huge lack of strictly drum packs for Future Pop genre, so they combined this massive pack of over 400 drum elements.

All the drums are grouped into kits to fit together. Everything is BPM labelled for ease of use. On top, you will also find a nice collection of percussion shots, which were produced from live recordings and foley sounds.

Over 500Mb of pure drum content, collected from Function Loops hit packs. These drums will rock in any Future Pop track and it's a great deal for producers looking for strictly drum content.

Details:

- 431 Drum Sounds
- 153 Drum Loops
- 72 Live Percussion Hits
- 206 Drum Shots
- 24-bit
- Only Drums included
