

W. A. Production wants you to expand outside of the confines of the genre bubble and add the latest Mystic twist into your Future Pop projects.

Future Pop began in the late 90's and emerged in early 2000. Giving us artists like VNV Nation and Assemblage 23. Giving the sound a trademarked arpeggiated synth, clean and clear sounds, strong danceable rhythm with a dramatic feel.

We believe we have come up with the best Future Pop Samples the market has to offer and will bring a whole new quality level to your mix.

Worried about mixing the samples or post processing them? Don't be, because these samples are of the utmost quality there is no need for over processing.

Just like all our packs we give you Construction kits that include all the samples as well as the tools to learn how to construct your own with confidence and an true understanding of the Future Pop sound structure. Our packs reveal our secrets so you can see exactly how we made it.
