

Future Pop & RnB Kits Vol 1' brings you 5 Construction Kits featuring catchy vocal lines inspired by the biggest hits worldwide.

Every single Kit is splitted up in the following parts:

MIDI: Each Kit has its own MIDI folder to give you the freedom of changing any melodic part or use your own sounds from any of your favorite soft synthesizers.

One-Shots: This folder includes all the single drum one-shots that were used for each Kit and allows you to drag and drop your favorite drum samples into your sampler and create new rhythms.

Stems: Essential Audio Media exported all the stems as 24-Bit WAV files so you can drag and drop them at once into your DAW and you'll have the full Kit.

Loops: All Stems are also available as 4-8 Bar loops exported as 24-Bit WAV to give you more freedom to make any stem file fitting into your project.

Vocals: Here you'll find the vocal stems exported in 24-Bit WAV which are available as Wet and Dry. That means you can pick the dry version and set the reverb or delay effect you need for your own projects.

Bonus Presets: This folder includes VSTi presets which were used for the Construction Kits and allows you to tweak every single sound.
