

'HELIX' by Essential Audio Media brings you 5 unique Construction Kits inspired by the sounds of Duskus & Deeprot. Each kit includes WAV Stems, Presets, One-Shots, WAV loops & MIDI files. This pack is a must-have if you are looking for some new inspiration.

Every single Kit is split up in the following parts:

**MIDI:** Each Kit has its own MIDI folder to give you the freedom of changing any melodic part or use your own sounds from any of your favorite soft synthesizers.

**One-Shots:** This folder includes all the single drum one-shots that were used for each Kit and allows you to drag and drop your favorite drum samples into your sampler and create new rhythms.

**Stems All & Dry:** Essential Audio Media exported all the stems as 24-Bit WAV files so you can drag and drop them at once into your DAW, and you'll have the full Kit. They also added a Dry folder where the synths are without any effects so you can add your own reverb or delay settings.

**Loops:** All Stems are also available as 4-8 Bar loops exported as 24-Bit WAV to give you more freedom to make any stem file fitting into your project.

**Presets:** In this folder you'll find the presets used in the Kits. Essential Audio Media have included presets for Serum.
