

The third edition of Hard Future House Drops is among us and has everything you need to make big smashing Future House tracks.

The Hard Future House Drops series have been famous because of their musical and useful ideas for crazy sounding drops, which are so important in Future House.

Not only did we of course include all the ingredients to make these phat drops, but also we created some wonderful loops and samples for the breaks - what is a great Future House track without an outstanding break, right?

Inspired by Don Diablo, MOTi, Mike Williams, Tchami and lots of others.

Due to big demand, presets for Serum and Spire are now included! 154 Serum and 9 Spire presets, all the presets which are used in most of the layers of the loops are added in the pack, really flexible!

Tried & Tested, these elements and loops should work to make your tracks stand out - Ladies and Gents, this is Hard Future House Drops 3.

Start producing now! Royalty Free!
