

Future Bass has been crossing boundaries and is on its way to becoming one of the most popular styles in dance music.

Unlike the popular genres like Electro and Big Room, **Future Bass** is still refreshing and bringing new ideas every time a release comes out.

Future Bass doesn't have a unique sound to familiarise, and in this pack we want to showcase that hidden gem from this genre.

From real **recordings** to add that warm ambient in the bottom of your track, processed **vocal** loops, exclusive effect samples like **chimes**, **timber**, **electric**, and bells. The synth and bass loops you here from the demo, and more key-labelled loops.

What's in the sample pack?

- 12 Synth Loops
- 20 Drum Loops
- 22 Percussion Loops
- 30 FXs Samples
- 4 Real Recordings
- 5 Vocal Recordings
