

Here at TAB's HQ, we are glad to showcase Ignite! A unique sample pack filled with audio loops, one-shots that cross-genres for those seeking a sound that evolves over time.

When you listen to the demo, you'll be hearing 3 different parts, which summarise the sound of Ignite sample pack. To put it simply, it's a collection of electronic/pop/ bass sounds you just couldn't find before, is a collection of one-shots with FXs, Stabs, Plucks, Bass Hits, Percussions, and Synths that are different from everything else in the market.

Also, there are Loops like key-labelled Melodies, Drums, Chords, and More! So the whole pack puts your hands on a serious piece of kit to breathe new life into your Electronic & Pop productions.

Our team of sound designers has already put countless hours into crafting all loops, and one-shots. This means you can get straight into making music without endless tweaking.

So from HQs of The Audio Bar, enjoy the sample pack!
