

"Liqui" is a must-have for every drum&bass producer. Freak Music decided to create this product to grow up your productions. **You will find a large library of samples, presets, loops and MIDI files focused on the liquid drum&bass genre.** This is the ultimate content to get you started and inspired for making professional productions in your favorite DAW. All those sounds are perfect to combine with each other as well as with other sounds. Files are categorized in folders for an easy access and 100% Royalty-Free, so once purchased, you can use them in your commercial releases without having to pay any hidden costs.

Also, we included a Liquid Drum&Bass Ableton Live template. You get an insight on the processing of the individual channels, through the use of EQ, compression, delay, reverbs, fades, volume and more. The full project will show you how to put together, arrange and mix the track, use chord progressions and how to mix the drums. In the main project you will find mastering tools made from native Ableton plugins. The whole project is based only on MIDI channels, so you can change the tempo without losing the quality. Even if you're not an user of Ableton Live, we exported MIDI files, Spire presets and WAV patches to give you the maximum possibilities on this template. It is totally Royalty-Free and can be used as a base for your upcoming tracks or as an educational and inspirational tool. All sections are color-coded and named correctly so you know exactly what you are looking at. The first track in the audio demo is an Ableton Live template.

Features:

- 10 MIDI construction kits
- 100 liquid drum loops
- 50 drum&bass samples
- 20 useful WAV loops
- 15 Xfer Serum presets
- 1 Ableton Live 10 project
