Samples taken from our best sample packs - this is the brand new:'' Make Some Noise - 2000 One Shots Samplepack''.

Every song, beat or track needs drums, basses, synths and fx and especially if you want to make all the melodies and beats yourself it is very useful to have some one-shot samples on hand.

That's why we decided to include over 2000 one-shots in 1 huge bundle.

All samples are divided into separate genres, such as House, Pop, Slap and Future House, Tearout, Techno, Hip Hop, Trap and All Genres.

We've checked our bestselling samples from all the bestselling packs of the past 10 years, we've done some extra minor edits and normalized to update the sounds and voila: ''Make Some Noise - 2000 One Shots Samplepack''.

Included are massive sounding Drum one-shots, 808 basslines and drums, synths, basses, FX, vocal chops, vocal one-shots, misc and much more.

Extra: we processed all tonal sounds in the C key, so it's easier to use in your production.

Extra note: melody and drum loops in the demo are not included, we made them by using the one-shots in this pack.

Pack content:
1140 Drum One Shots (claps, kicks, snare, hiats, perc, rimshots, shakers etc.);
