

'Melodic Deep House Sessions Vol 2' brings you again five Construction Kits inspired by labels and artists such as Anjunadeep, Meduza, Enormous Tunes, Nora En Pure, Ben Böhmer & Meduza. This pack is filled with everything you need as a producer and can be also used for Progressive House & Melodic Techno.

Every single Kit is split up into the following parts:

MIDI:

Each Kit has its own MIDI folder to give you the freedom of changing any melodic part or use your own sounds from any of your favorite soft synthesizers.

One-Shots:

This folder includes all the single drum one-shots that were used for each Kit and allows you to drag and drop your favorite drum samples into your sampler and create new rhythms.

Stems Dry & Wet:

Essential Audio Media exported all the stems as 24-Bit WAV files so you can drag and drop them at once into your DAW and you'll have the full Kit. They also added a Dry folder where the synths are without any effects so you can add your own reverb or delay settings.

Loops:

All Stems are also available as 4-8 Bar loops exported as 24-Bit WAV to give you more freedom to make any stem file fitting into your project.

Presets:

Inside this folder, you'll find the presets used in the Kits. Essential Audio Media have included presets for Spire and Sylenth1 VSTi's.
