

'Melodic Deep House Sessions Vol. 4' brings you another set of five unique Construction Kits inspired by labels & artists such as Anjunadeep, Meduza, Enormous Tunes, Nora En Pure & Ben Böhmer. This pack is filled with everything you need as a producer and can be also used for Progressive House & Melodic Techno.

Every single Kit is split up in the following parts:

#### MIDI:

Each Kit has its own MIDI folder to give you the freedom of changing any melodic part or use your own sounds from any of your favorite soft synthesizers.

#### One-Shots:

This folder includes all the single drum one-shots that were used for each Kit and allows you to drag and drop your favorite drum samples into your sampler and create new rhythms.

#### Stems Dry & Wet:

Essential Audio Media exported all the stems as 24-Bit WAV files, so you can drag and drop them at once into your DAW, and you'll have the full Kit. They also added a Dry folder where the synths are without any effects, so you can add your own reverb or delay settings.

#### Loops:

All Stems are also available as 4-8 Bar loops exported as 24-Bit WAV to give you more freedom to make any stem file fitting into your project.

#### Presets:

Inside this folder you'll find the presets used in the Kits. Essential Audio Media have included presets for Spire and Sylenth1 VSTi's.
