

Audentity Records proudly presents: Metal Skull Riddim, a new pack with a huge amount of Serum presets and loops.

This pack contains sounds from another world: heavy basses, smashing melodies and dirty leads, just like it should be in a headbanger riddim & tearout dubstep pack.

Sounds were inspired by headlining acts from the dubstep industry like Zomboy, Snails, Excision and many more.

Just drop the presets in your Serum synth and start creating your next banging track, the pack is not only useful for genres like Riddim and Tearout Dubstep, but also for Hard Trap, Grim, Drumstep and Drum & Bass.

Be prepared to achieve the ability to make riddim bangers like the big ones out there.

All Serum presets' macros are usable and can change the whole sound of the presets.

Metal Skull Riddim contains:

205 Serum presets (v1.341 and higher)

16 Bass Loops

7 Riser Loops

4 Pad Loops

3 Music Loops

Included are mp3 examples of every preset.

100% Royalty-Free.

Synth Preset Compatibility:

Please Use Xfer records Serum 1.24b8 Or Higher.
