'Modern Tech Trance 4' by Elevated Trance is the 4th pack in this amazing series featuring another 20 Outstanding Tech Trance Construction Kits with WAV, MIDI, and Presets.

Modern Tech Trance, an evolution of the classic Tech Trance genre, stands as a testament to how electronic music can evolve over time while remaining rooted in its foundational elements. Developing from the late 2010s onwards, Modern Tech Trance builds on traditional techno and trance fusion, integrating elements from other genres like progressive house and psytrance.

This subgenre retains the high energy and driving beats of classic Tech Trance, usually within the 130-140 beats per minute range, but it's characterized by a more polished and sophisticated production quality. The intricate rhythmic structures and hypnotic synth patterns are still present, but there is a greater emphasis on atmospheric soundscapes and innovative sound design, often resulting in a more immersive and dynamic listening experience.

Modern Tech Trance thrives on the delicate balance between the raw, hard-hitting techno beats and the euphoric, melodic elements of trance, creating a genre that is both emotionally resonant and highly danceable. This subgenre continues to push the boundaries of electronic music, captivating listeners with its complex musicality and transformative energy.

Inspired by all the top Tech Trance artists and all the top Tech Trance festivals bringing you the best quality tools for your productions. These kits will give you a great start to your next anthem or could be a great addition to your existing projects to give you that edge you've been looking for.

The kits contain three folders MIDI, Wav & Presets, the Wav folder contains all the stems needed to re-create what you hear in the demo for that kit, and the MIDI folder contains all the MIDI files for that kit to change notes or sounds when you are creating your new anthem and the Preset folder contains all the spire presets used with the MIDI files for each kit.

The presets in this pack are **FREE** they are used as a starting point for each kit but may contain duplications or similar sounds.
