

D-Fused Sounds proudly release "Percumania", a diverse array of percussions elements and rhythmic patterns designed to bring groove and movement to your dance tracks.

Percumania includes 100 percussion loops at tempos ranging from 120 to 126 BPM, perfect for layering with your drums or use as a starting point for the rhythmic core of your tracks. Also included is a selection of 40 one-shot used to create the loops, giving you the flexibility to craft your own custom rhythms from scratch.

All the samples in Percumania are served in wave 24 bit and tempo tagged for easy integration with your music. Whether you're producing house, tech house, deep house, minimal or techno, these loops will give life to your drum section!
