

HighLife Samples presents 'Progressive House Track Stems Project'.

This pack contains a full Progressive House track production, broken down into individual tracks of drums, basslines, melodies, pads & mixed FX plus the MIDI files of each track allowing you full flexibility to control and recreate the melodies and basslines with your own favorite synth sounds.

If you love powerful Progressive House tracks and you are a fan of releases from Coldharbour Recordings, Armada, Black Hole, then this pack has been made for you.

Download this pack and recreate the structure of the HighLife Samples demo tune, with the added option of adding your own personal style.

This pack will also help you learn the secrets of how all these sounds fit together to create a full, solid sounding tune.

Containing full WAV files for each track and MIDI too, this download gives you easy access to edit each part in your favorite DAW software.
