

Progressive Psytrance brings 5 x Key Labelled monstrous Kits, loaded with Stems, Loops, Single Shots & MIDI files. If you are into the sound of Hommega, Spintwist, Iboga, Blue Tunes and alike, this collection will do the job.

Each Kit comes with Full Stems, just import to the DAW and you will have the arrangement, as you hear in the demos - perfect to get some inspiration and start your tracks quick. The Kits are also loaded with normal Loops, One Shots, MIDI files and Bass Samples. These Bass Samples are worth gold, these are the sounds big names are using to get their scary fat Basslines. Now you can do it too.

On top of all that, we also attached some Bonus presets for Serum, Spire, Vanguard and Sylenth. The pack is loaded with 340 Files, 1.5GB of content, 100% Royalty-Free.

This is the pack you were waiting for so long, this is the pack we promised you. Start making world class tracks right now, let's see what the labels say :)
