

Laniakea Sounds are back with «Progressive Vocal Chops 5» - a authentic and inspiration collection of chopped and processed vocal loops with special atmospheres sounding for Progressive Trance and Progressive House music.

After a big success of previous volumes of «Progressive Vocal Chops» we are proud to present unique sample pack filled a breathtaking and soft vocal chops suitable for all styles of progressive music in most popular 128 BPM. In contrast with other parts of that series we expand and make it more mesmerising and universal.

Vocal chops can be used as in breakdown with our previous sample packs from «Vocal Atmospheres» series, as in massive trance 2.0 drops and even with drive basslines and we show it to you how it works in demo-track. All loops are key labelled and synced to any BPM. For better learning we include dry loops for vocal chops. Be sure, that content make your music more interesting and solid!

Note: this pack contain only vocal chops, other sounds taken from construction kits from previous sample packs and not included.

Download includes :

- 70 WAV Files in total
- 35 Wet vocal chops
