

The Fusion Activates Again

We are back with the second volume of Psytrance Fusion. You could say it took us a while to come up with a second volume, but we wanted to make sure the second edition of this series would surpass the first one.

Psytrance Fusion was the all time second preset pack that we've made. It has become an iconic sound bank when it comes to the Fractal Sounds style and approach to sound design.

The bar was high for the second edition, but we came up with an incredibly solid sequel. Like many of our products, Psytrance Fusion 2 has been made using sound sources available only from our catalog.

Inside this sound bank, you will find wavetables from Quantum Fold, Acid Splash and The Prophecy. Only our cutting edge sound prints have been used to generate mind melting presets. We also used some of the Mycological Granular Sources which are unique on the market and the results generated using these sources will make you question what you assumed that Pigments was capable of.

Another thing we aimed for, was to get a perfect balance between faster styles of psytrance and a more progressive approach. This sound bank perfectly walks the edge between all genres of psychedelic dance music.

This pack contains:

- 20 Arp Presets
- 6 bass Presets
- 9 FM Lead Presets
- 7 FX Presets
- 9 Grid Presets
- 19 Lead Presets
- 12 Pad Presets
- 18 Zap Presets

★ This sound bank requires Pigments version 4 and higher to run
